

Amendments to the Specification:

ARC 12/4/06

Please replace paragraph ²³[24] with the following amended paragraph:

²³
[24] Figures ~~11a-d~~ 11A-D illustrate a process, and example drawings manipulated by the process, according to one embodiment of the present invention.

Please replace paragraph [25] with the following amended paragraph:

[25] The present invention may be more readily described with reference to FIGS. 3-12. Figure 3 illustrates a schematic diagram of a conventional general-purpose digital computing environment that can be used to implement various aspects of the present invention. A computer 300 may include one or more processing units 310, system memory 320 (RAM 350 and/or ROM 340), system bus 330, and basic input/output system 360 (BIOS). The computer 100 also includes a hard disk drive 370 for reading from and writing to a hard disk (not shown), a magnetic disk drive 380 for reading from or writing to a removable magnetic disk 390, and an optical disk drive 391, etc. for reading from or writing to a removable optical disk 392 such as a CD ROM or other optical media. The hard disk drive 370, magnetic disk drive 380, and optical disk drive 391 are connected to the system bus 330 by a hard disk drive interface 392, a magnetic disk drive interface 393, and an optical disk drive interface 394, respectively. The drives and their associated computer-readable media provide nonvolatile storage of computer readable instructions, data structures, program modules and other data for the personal computer 100. It will be appreciated by those skilled in the art that other types of computer readable media that can store data that is accessible by a computer, such as magnetic cassettes, flash memory cards, digital video disks, Bernoulli cartridges, random access memories (RAMs), read only memories (ROMs), and the like, may also be used in the example operating environment.

Please replace paragraph [26] with the following amended paragraph:

[26] Computer 300 may include a number of program modules, such as an operating system 395, one or more application programs 396, other program modules 397, and program
